COMFORT, STYLING, UV - AND HEAT PROTECTION

FOLIATEC® Quality Automotive window films are designed to filter or reject solar radiation. Thanks to their high-grade multi-layer design the films effectively select and filter light, heat and UV radiation. The degree of rejection and filtration depends on the material design of the specific film type fitted.

Below we'll give you a simplified description of the connection between solar radiation - UV, light and heat radiation - and the effect of FOLIATEC® Automotive window films.

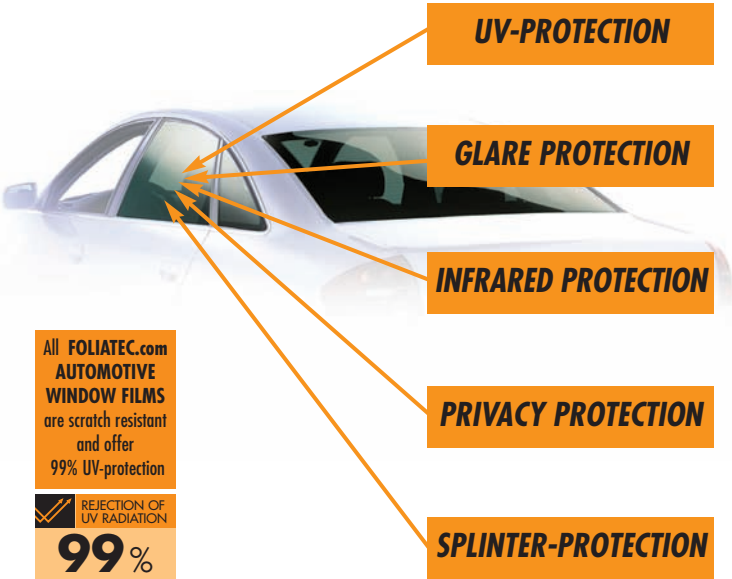

PROTECTION FUNCTION

FOLIATEC® Automotive Window Films have a sandwich design combining high-quality materials for different functions. This high-tech design gives the Automotive Window Films their protective properties, durability and optimum processing properties.

Depending on the area of application, the film additionally features a precious metal layer that creates a higher level of heat reflection in tinted films with heat protection, for example.

All films also provide the occupants of the vehicle with a degree of protection in the event of an accident thanks to their splinter-proof effect.

STYLING

individual styling and a cool look

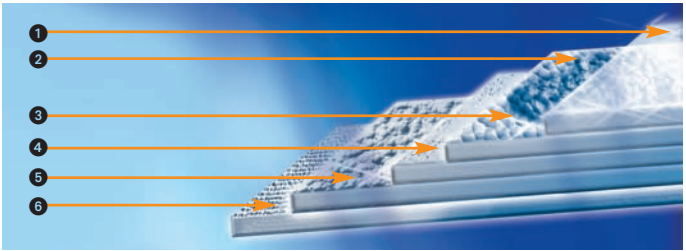

PROTECTION

99% UV-protection (prevents fading - protects passengers)

COMFORT

optimum glare, privacy and heat protection

MATERIAL QUALITY

1 SILICONE-TREATED PROTECTIVE FILM

The protective film provides pre-film protection for the acrylic resin adhesive.

2 ACRYLIC RESIN ADHESIVE

The acrylic resin adhesive ensures permanent and blister-free bonding plus Perceptible installation benefits. The adhesive layer includes an UV adsorber which protects the layers below.

3 POLYESTER FILM WITH PRECIOUS-METAL COATING

An additional metallization of the polyester film layer UV/HeatProtectionFilms ensures an efficient heat rejection.

4 MULTILAYER ADHESIVE

Bonds the polyester film layers into a stable assembly. The multilayer adhesive also features an UV absorber.

5 DYED-THROUGH OR TRANSPARENT POLYESTER FILM

The dyed-through or transparent film design gives the film its unique appearance.

6 ADDITIONAL HIGH-PERFORMANCE SCRATCHPROOF COATING

This highly effective surface coating prevents a scratching of the film (suitable for wind-up windows) and ensures a long durability of the product.

HOMOLOGATION

AUTOMOTIVE WINDOW FILMS are tested and homologated FOLIATEC® products. Watch out for this trademark - it guarantees top quality, protection, safety and distinctive styling.
